

Population Statistical Formulas

Birth Rate = Number of Births / Population X 1000

Death Rate = Number of Deaths / Population X 1000

Natural Increase Rate = Birth Rate - Death Rate

Immigration Rate = Number of Immigrants / Population X 1000

Emigration Rate = Number of Emigrants / Population X 1000

Net Migration Rate = Immigration Rate - Emigration Rate

Population Growth Rate = Natural Increase Rate - Net Migration Rate

Doubling Time = 70 / (Population Growth Rate /10)
